

MSM, BLUEPRINT, LIVE COPY, AND ROLLOUT

Creating an MSM-Based Site with us/en as the Source

1. **Blueprint Creation:** Defined the master structure, which would serve as the base for other site versions.
2. **Live Copy Generation:** Created a version of the blueprint at a different path to maintain consistent content.
3. **Content Rollout:** Applied updates from the blueprint to the live copy, ensuring both stayed in sync.

The screenshot shows the 'Blueprint Configurations' table in the AEM interface. At the top, there are 'Properties' and 'Delete' icons, and a '1 selected' status indicator. The table has two columns: 'CONFIGURATION' and 'SOURCE'. There are two rows: 'Experience Fragments' with source '/content/experience-fragments' and 'Practice Blueprint' with source '/content/myTraining/us/en'. The 'Practice Blueprint' row is highlighted in blue and has a checkmark in the selection column.

| Blueprint Configurations | |
|--|-------------------------------|
| CONFIGURATION | SOURCE |
| <input type="checkbox"/> Experience Fragments | /content/experience-fragments |
| <input checked="" type="checkbox"/> Practice Blueprint | /content/myTraining/us/en |

Building the McDonald's 'About Our Food' Page in AEM

1. **Page Creation:** Utilized AEM's tools to build the page layout and structure.
2. **Component Integration:** Added elements like images, text blocks, and buttons to match the desired design.
3. **Page Publishing:** Published the page, making it accessible within the AEM environment.

About Our Food

We're Passionate About Our Food

From adding more balanced choices to our Happy MealTM menu to serving up **fresh beef** Quarter Puunder[®] burgers that are cooked when you order, we're always finding ways to show our commitment to food.

Local Setup of AEM Dispatcher

1. Prerequisite Check: Ensured all necessary software and configurations were ready.
2. Dispatcher Module Installation: Downloaded and integrated the dispatcher module with Apache.
3. Configuration Setup: Applied routing configurations to enable traffic flow through the dispatcher.
4. Final Testing: Restarted services and verified the setup for proper functionality.

Commitment to Quality

We're dedicated to improving the way we prepare our quality food and the ingredients that go into it.
